

Ningbo Gongtie Precision Machinery Co., Ltd. is national high-tech enterprise, which focusing on precise CNC lathe , whole machine automation , "machine substitution" project innovation and smart factory integration.

The company headquarter is based on Ningbo of China, and the European R&D center is located in Reggio emilia, ITALY .Since the foundation in 2008, the company continuously advocates scientific and technical innovation . For better servicing the customers, Gongtie fully take the advantages of advanced concept and technology from European country like ITALY and GERMANY, connect with the domestic actual manufacturing, and dedicate to the precise CNC lathes and industrial robot field, set up the most feasible custom-made technique solution and "EPC" project for the final customers.

With strong technique strength and almost ten years experience, GONGTIE will devote to connect the European technique to realize the domestic manufacturing, and dedicate to the new era of industrial intelligence, building up the most competitive china smart manufacturer.

The company' s diversity machine series is widely used in automotive parts, valve, bearing, electric application , instrument, sanitary and more other industries, can realize various processing technology like drilling, turning, milling, boring, tapping, grooving and so on. We have set up sales office at several places and perfect sales representative network. And we completely follow the ISO9001:2015 quality management system and security management system on the development and manufacturing, to guarantee the quality and safety during the customers' application. In addition, we have built up a perfect after-sales service system, can in-time make feasible reaction for the customers' any inquiries or problems.

The CNC machine from Gongtie has below advantages:

- broaden application range
- high precise, reliable features, fine finish and stable processing.
- save labor costs
- competitive price with high quality assurance

The company mission:

- Continuous innovation
- Quality priority

- Customer focused
- Solution driven

With our accurate, reliable products and perfect service system, we have won the trust of many users, and gradually built up a good brand impression in domestic & abroad market.
